World One Health Day timetable - DRAFT

Morning session (10-11:45): Research Talks

Time	Speaker
10:00–10:05	**Professor Soren Alexandersen DVM, PhD, DVSc, FRCPath, MRCVS** Director, Geelong Centre for Emerging Infectious Diseases ***Welcome and Introduction***
10:05-10:15	**Dr Beata Ujvari** Senior lecturer, Deakin University ***"Transmissible cancers in wildlife"***
10:16-10:26	**A/Prof Daniel O'Brien** Deputy Director, Dept of Infectious Diseases, Barwon Health ***"Beating Buruli Ulcer"***
10:27-10:37	**Dr Vanina Guernier** Associate Research Fellow, Geelong Centre for Emerging Infectious Diseases ***"Antimicrobial resistance: when bacteria in our environment becomes a problem"***
10:38-10:48	**Dr Tim Doran** Australian Animal Health Laboratory ***"Vaximiser – enhancing eggs for vaccine production"***
10:49-10:59	**Refreshment break**
11:00-11:10	**Jessy Vibin** PhD Student, Geelong Centre for Emerging Infectious Diseases ***"Birds, viruses and people"***
11:11-11:21	**Dr Daniel Dlugolenski** Postdoctoral research Fellow, Deakin University ***"Lurking in the Shadows" Past, Present, and Future insights on Bird Flu***
11:22-11:32	**Dr Gemma Vincent** Medical Scientist, Australian Rickettsial Reference Laboratory ***"Taking the Query out of Q-fever"***
11:33-11:43	**Dr Elizabeth Pharo** Australian Animal Health Laboratory ***"Advanced cell culture models to combat emerging human respiratory viruses"***
11:44-11:45	Concluding remarks

Lunch (noon-1:15): Researcher interaction

Display	What
Station 1	Identifying infections under the microscopy
Station 2	virus detecting using molecular biology (Electrophoresis and real time PCR)
Station 3	Video showing Avian Influenza
Posters	One Health Posters on display with researchers

Afternoon session (1:30-3pm): Interactive Hendra virus story

Theme	Presenter
Animal Health (1:30-1:55)	AAHL researchers demonstrate how they test bats and horses in the field for Hendra virus. What steps do they take to protect themselves and the environment?
Surveillance (1:55-2:20)	

Human Health (2:20-2:45)	BH Infection prevention team demonstrate isolation principles. What steps do they take to protect themselves and the environment while treating the patient? How are unknown infectious diseases identified?
Questions (2:45-2:50)	
Concluding remarks	Soren Alexandersen
